Currently, the styles and designs of LED lamp available in the market for choosing are limited.

In view of this, the characteristic of LED in the Bottle allows consumers to determine the style of lamp on their own.

Furthermore, LED in the Bottle can never be outdated as the style of it can be changed unlimited times.

With LED in the Bottle, users can purchase their favorite bottles from the market, recycle beverage bottles or apply other appropriate bottles and decorate them in various ways. A unique and one-of-a-kind bottle can then be created for suiting interior decoration and personal taste.
